EXPERIENCE

Software Engineer SIEMENS

Jan 2025 – Present Pune, India

- Boosted knowledge worker productivity by 30%, measured via reduced time spent searching for information—by developing and deploying a Teamcenter AI Chat Interface using Java, Python, JavaScript, React.js, Node.js, RESTful APIs, AWS Bedrock.
- Drove a 1.4× uplift in average user session depth by elevating personalization and conversational continuity through a context-aware interaction tracking system built with AWS DynamoDB, Redux.

Software Engineer Associate SIEMENS

July 2022 – Dec 2024 Pune, India

- Reduced bug escape rate to 1 in 15 by adopting a TDD-based approach and implementing comprehensive unit and integration tests leveraging mocking and stubbing techniques achieving over 90% code coverage in critical modules using Pytest, JUnit.
- Developed a high-throughput document ingestion, parsing, and indexing system using message-queued asynchronous processing, improving throughput by 43%—Python, Apache Tika, Elasticsearch, OpenSearch, RabbitMQs.
- Reduced infrastructure provisioning time from 2 hours to 30 minutes while improving resource utilization by 40% by implementing a containerized, automated deployment pipeline and microservices-based architecture for Teamcenter X AWS, GCP, Docker, Kubernetes, Terraform, Ansible, Gitlab CI/CD
- Improved collaboration between technical teams and business stakeholders raising stakeholder satisfaction from 3.8 → 4.6 out of 5 by translating complex technical concepts into accessible visuals and discussions PLantUML, Myrmaid.

EDUCATION

BTech in Computer Engineering, Vishwakarma Institute of Technology

July 2022

CGPA: 9.49/10

Relevant Coursework: Data Structures, Algorithms, AI, System Software, OOP, Databases

SKILLS

Problem Solving & Debugging Skills

462+ Problems Solved on LeetCode in C++

Programming

C++, Python, Javascript, Java

Frameworks & Libraries

Spring, Node.js, React.js, Redux

Cloud & DevOps

AWS, Docker, AWS EKS, Terraform, Ansible, GitLab CI/CD

Database Systems Certifications Aurora MySQL, Dynamodb (NoSQL), Opensearch, Elasticsearch AWS Certified Cloud Practitioner, Scaled Agile Framework (SAFe)

PROJECTS

UptimeBoard. A third-party Uptime Kuma monitoring dashboard — using Next.js 15, TypeScript, React.js, HTML5, and CSS3. Implemented intuitive UI patterns, real-time auto-refresh, multi-theme support, and latency visualizations via Recharts, delivering a clean and scalable dashboard experience.

Chain4India. Supply Chain Management using Hyperledger Sawtooth, Javascript, Google Maps API for PPE kits and Masks. It led to increased student participation and raised 2187\$ from IEEE Humanitarian Technologies Board.
